Re: Henson Recycling Campus Transfer Station

Dear Phil,

We own and operate six automobile dealerships in Bloomington. We have learned that Lakeshore Recycling Systems applied for site approval under the McLean County Pollution Control Facilities ordinance. The proposed Henson Recycling Campus Transfer Station is in close proximity to all of our franchised dealerships.

We initially were informed that this was to be a recycling center. We already had some concerns with this proposal, but now it appears that the facility will also be allowed to manage and transfer household garbage. We have grave concerns with this proposal and want to extend our concern to the County.

As you are probably aware, we have invested heavily in our facilities and the Bloomington-Normal community. This has included upgrading facilities, new storefronts, and a continuing effort to maintain and enhance our properties. We have just finished a major upgrade to our Chrysler, Jeep Dodge, and Ram facility, are in the process of a major upgrade at our BMW location and have plans in the works for a brand-new Ford store. In short, we are investing millions that in turn will benefit both Bloomington, Normal, and McLean County. Our tax revenue alone is worth your consideration of our concerns.

We are located just Northeast of this proposed site. All our mentioned efforts will be in vain if this proposal is approved to proceed. Summer breezes from the south mixed with a garbage collection center would not be welcomed by our businesses, our employees, and our customers. We strongly urge the County to reject the proposed Henson Recycling Campus Transfer Station.

Sincerely submitted,

Ben Lemman

I am writing concerning the proposed transfer station in McLean County. Bradford Supply Company, is located at 2000 South Bunn Street, Bloomington, IL. and neighbors to the operation that wants to expand its recycling transfer station. Each expansion becomes more of a problem. The noise continues to increase and the dust is already a problem. The dust falls onto the plastic pipe and other products that Bradford sells, requiring our employees to take product to a car wash to clean before it can be presented to the customer. This is an expense that continues to increase with apparently no relieve in the future. Bradford Supply Company supports successful business, but the noise and dust pollution is becoming a problem to a point, it can no longer support without some form of solution to correct the current problems and any future expansions.

Bradford Supply Company will need to see specific plans that are approved and guaranteed to be implemented before it can approve or support any future expansion of the transfer station.

Kathy Michael,

It has come to my attention that there is a possibility of a garbage facility being planned in Bloomington on Bunn Street. My neighbors and I are very strongly opposed. We do not need or want anymore garbage coming into our neighborhood.

As a homeowner on Bunn Street, I have noticed the amount of traffic, that has already generated from the recycle center being out on Bunn Street just for the Bloomington Normal area. I do not wish to see more traffic up and down this road here on Bunn street. Please if there is any meetings or anything to vote against this new Chicago garbage company trying to come down here to Bloomington and create more crap than what we already have please let me know. I did get a notice on my door and I am writing to you and to let you know that we do not need that Chicago company coming down to tear up our streets with more junk and pollute our city thank you for your time.

Good Morning

I am emailing with concerns of this company from Chicago. I live on Bunn street and this concerns me not only because we don't need anymore garbage coming into our community but that the roads are bad enough in this town without tearing them up more. Also Bunn Street is a very busy road already and adding this will double if not triple the amount of traffic and I am concern for not only my grandchildren that visits but other children around this area for their safety. Also why let them profit off of us. I hope you take in deep consideration of my email as well as others and stop this from happening. Thank You!

I live on Bunn and Lafayette and have lived here for 52 years. We do need any more trucks going down Bunn. We get them all day now from the city and other companies picking up items and taking them to Hensons. Why do we need to take Chicago garbage? This street is noisy enough and we don't need more trucks. This will lower our property values. Please do not pass this.

Thank you.

Subject: possible Transfer Station on Bunn Street

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I've been hearing about this new transfer station proposal on Bunn Street. No way could this ever make sense for our community. That would be so close to neighborhoods where people are raising families and minding their own business and don't want to be bombarded with big trucks driving through the streets all day every day. Not to mention the smell. With as much trash as they are saying this transfer station would take in, I don't think we could stand to live nearby. It feels obvious to me that this is a bad idea. We need developments here that improve our day to day lives, not things like new trash facilities that are going to ruin the value of our homes and make us miserable.

Thanks. I hope you really take all of this into consideration

Subject: Say NO to Chicago garbage!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

This e-mail is regarding the garbage site on South Bunn St. It is a well-known fact. That the city of Chicago uses the rest of the state as its dumping grounds calling us the deplorable ones. So many people live in this area, and it would lessen the quality of life, lower our property values, and give residents yet another headache to deal with. No Chicago trash should be shipped into Bloomington. Illinois has Long been a dumping ground for the city, it is ridiculous and infuriating that a major Liberal city doesn't have the capacity or means to resolve their own trash issues. It's just like Democrats to push their problems on other people expecting a solution to come from thin air. The people of Bloomington do not want more trash coming down from the city. There is only more noise and dust that comes along with it. People are fed up. People are tired. And something must be done Chicago About taking advantage of other places in Illinois!

Hoping you make the Right decision,

Patrick Smithson

I just wanted to write in and share my two cents. Traffic in that area is only going to get worse and so is the noise if this moves forward. It is going to be bad for the roads but more importantly bad for the neighborhood. I believe when you consider all of that alongside the negligible benefits it would bring, choosing not to approve this project makes a lot of sense. Please do the right thing and say no to the transfer station.

Subject: Strong Concerns about Henson project

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

To whom it may concern-

McLean County and greater Bloomington can be something other than the dumping ground and industrial wasteland for Chicago and other municipalities and counties. Now we are going to take more of **their trash??**

The Henson project was shared with the community as a recycling initiative, but it appears it is genuinely a recycling center for household waste. Please do not let this happen. We need to consider natural alternatives that are better for the environment. It's time for us to consider what Germany is doing with their waste.

"Germany is leading the way in waste management and recycling. With the introduction of their recycling scheme the country has been able to reduce their total waste by 1 million tons every year. Germany recycles 70% of all waste produced, this is the most in the world. The country achieved this through their policies regarding waste, companies are held responsible to whether or not their packaging is recyclable, when consumers purchase goods they are then responsible for the disposal of them. As well as these policies the country has implicated the Green Dot policy which means all recycled packaging must be marked and need to be approved to use that mark. Companies also have to pay a fee when more packaging is used, this has led to not only less packaging but also thinner glass, paper and metal. There are 5 different bins used to differentiate waste and rubbish."

<https://sustainabilitymag.com/top10/10-countries-tackling-plastic-pollution>

Enough is enough of the industrial development with no giveback to the community. Let Bloomington be a waste trend setter in a more sustainable way for our planet.

Thank you for your time and consideration,
Bax Procter

Subject: Transfer Station Really?????

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I am writing concerning the proposed transfer station in McLean County. Are we serious??? Is this what we really want in our community, like come on now. We cannot be a thriving and vibrant community with this crap in our community. I have five good reasons why this shouldn't be here.

1. Putting a transfer station this location will cause serious air and noise pollution.
2. This transfer station will cause increased traffic, emissions, and noise, which can be detrimental to the health and well-being of residents, especially children and the elderly.
3. This could seriously affect property values, making it less attractive to potential homebuyers and potentially leading to economic decline in our area.
4. There are potential risks to the environment.

I strongly urge you to reconsider the proposed location of the recycling transfer station and explore alternative sites that are more suitable and less impactful on residential areas. I just ask you to be real with yourself for one second, after hearing those reasons stated above, does it make sense for this to be in our community. Best Regards,

Concerned Resident

Re: Lakeshore Recycling Systems - *Proposed* Transfer Station

FILED
McLEAN COUNTY, ILLINOIS

NOV 27 2023

Kathy Michael
COUNTY CLERK

I first became aware of the Lakeshore Recycling Systems (LRS) *Proposed* Transfer Station application for site approval; after reading an article written by Charlie Schlenker posted on the WGLT Local News website, dated 11/16/2023.

Currently, our neighborhood and the surrounding businesses by Henson's Disposal/Lakeshore Recycling Systems (LRS) experience the following negative environmental conditions:

- Smell - rotting mulch smell which burns nose & throat
- Dirt/Concrete Dust - constantly having to wash car & home
- Noise - traffic noise, whining machinery, bucket trucks dropping buckets to ground creating loud bangs

The route traveled by trucks creates:

- Increased Traffic - on roads & railroad tracks that already need maintenance
- Trash/Construction Material/Tree Limbs & Branches - falls off the trucks along their route forcing businesses & homeowners to clean up

I believe the Proposed Transfer Station will make the current environment even worse than what it currently is.

I respectfully ask you to please vote "NO" on this proposal.

Thank you,

Sandy Fike

To Whom It May Concern:

I am writing concerning the proposed Lakeshore Recycling Systems (LRS) / Henson Recycling Campus Transfer Station application for site approval. I live in the adjacent neighborhood that would be impacted by this facility. While I understand that I have the option to leave, I would like for you to carefully evaluate the negative impact that this facility would have on Bloomington / Normal if it is built at this location.

The proposed LRS facility would negatively impact the surrounding businesses that have contributed so much to the local economy. For instance, Sam Leman has invested in renovations and expansions of their various dealerships in the last decade. The expansions would not have been possible without new and returning customers. How can Sam Leman and other businesses like them thrive and expand in the future if this facility is allowed to be built? Customers simply would not return because of the foul smell. Unfortunately, decisions like this give successful businesses a reason to not invest in the area and worse - potentially leave. There is plenty of non-developed land on this side of town. Why would potential businesses consider investing and developing in this area? The dust would have an immediate impact on surrounding businesses, but the smell would have an even greater impact because it would also affect businesses and homes further from the site. What do you want this area to be in the future - thriving businesses or a dumping ground?

Please vote NO on this proposal.

Respectfully,

Cheryl Reichert

December 8, 2023

We should all favor the free enterprise system that values competition over monopoly.

I am writing this letter in support of the LRS/Henson Disposal Transfer Station application because it will offer citizens of McLean County an alternative to the current Republic Waste Transfer Station monopoly.

Having sat through the full two days of the Transfer Station Hearing, it was obvious that the three main concerns of neighbors were not concerns at all. To begin the feeder garbage trucks are fully enclosed as are the transport trucks, and the garbage exchanges were made in a fully enclosed building with negative air pressure and odor control. The building is over 1,000 feet from nearest residence, so there is no odor or dust. Traffic was proven not to be an issue.

The financial advantages of a competitive Transfer Station are significant. Therefore, please vote in favor of the LRS/Henson Disposal Transfer Station.

Respectfully

RA Fassin

Good morning,

As a 29-year McLean County resident, I want to express my opposition to the solid waste transfer station project proposed for the area immediately south of Bloomington. Its potential for excess truck traffic, odor, and blowing trash is far too great to be located this close to the active commerce along Veteran's Parkway as well as the residential areas of south and east Bloomington. (Having once lived within range of a meat packing plant, I can testify to the negative impact even an occasional breeze from the wrong direction can make.) This action represents a long term and potentially detrimental impact to the development and prosperity of our community. Please vote NO on this proposal. Thank you.

David W. Torbeck

My name is Ed LeMonnier and I am writing to express my deep concern and opposition to the proposed trash facility in Bloomington. As a resident and business owner in the area, I believe that the establishment of such a facility would have detrimental effects on our community.

Firstly, the potential decrease in property values is a major concern for homeowners. The stigma associated with waste management facilities can result in a decreased demand for properties in the vicinity, leading to a significant decline in home values. This, in turn, could have long-lasting implications for the financial stability of many families who have invested in their homes in Bloomington.

Moreover, the negative impact on local businesses cannot be understated. Establishing a trash facility nearby may discourage potential customers from visiting or patronizing businesses in the area. The unpleasant odors, increased traffic, and overall environmental concerns associated with such facilities could drive away both local and prospective customers, leading to a decline in revenue for businesses that have worked hard to establish themselves in Bloomington.

Additionally, the potential environmental hazards posed by a trash facility can threaten the overall well-being of our community. Increased traffic from waste disposal vehicles, noise pollution, and the potential for hazardous waste leaks could pose health risks to residents and harm the natural ecosystem in the area. This, in turn, may deter individuals and businesses from choosing Bloomington as a desirable place to live and work.

In light of these concerns, I urge you to reconsider your support for the proposed trash facility and explore alternative solutions that prioritize the well-being of our community. It is crucial that we work together to find sustainable and environmentally friendly waste management solutions that do not compromise the quality of life for the residents and businesses already established in Bloomington.

Thank you for your attention to this matter. I trust that, as our elected representative, you will carefully consider the long-term implications of this proposal on our community and advocate for the best interests of those you serve.

To whom It May Concern:

I wish to register my comment and deep concern about the application of Lakeshore Recycling, Republic Services to build a Transfer Center on property they own but within the township of Bloomington, IL . A Transfer Center would be devastating to the quality of life here in Bloomington. In order to keep our community clean and quality of life sustained, we do not need the dust, smell, noise, and constant traffic of large trucks. There is a potential for increased accidents. The prospective site property is close to home owners, businesses, and rental residents. The reputation of Bloomington smelling bad will detour possible visitors who spend money to change, and go elsewhere to visit and spend money.

In addition, there is the added real probability that the garbage will eventually seep into our water supply. The transfer center will no doubt attract rats and other scavengers, which will prompt Lakeshore Recycling to spread pesticides which in itself is a serious health danger to all animals including humans.

Lakeshore is wealthy enough to purchase a more appropriated location away from municipalities and maybe off the Interstate.

Please keep our quality of life high and keep the Transfer Center out of Bloomington Township.

Sincerely,

Patricia Morin

As a District 9 constituent of McLean County believe that the Henson Disposal waste transfer facility is not beneficial to many Home owners in the area. Many of those that live nearby would be negatively affected.

As someone who lives nearby there is already a fair amount of industrial traffic that already exists near Lincoln and Bunn st. Please take in consideration the Environmental effects for those who live nearby. Not only possible smell or noise but animals who live in the area may find themselves on the road more grabbing dropped scraps.

Please consider thinking as those who live only a few blocks away from this point of understand how it would feel.

As you are deciding for those feeling that way hearing that just passive living your life like going outside and enjoying clean air could be negatively impacted.

As a resident of McLean County and a constituent, I urge you to oppose the trash transfer facility proposed for SE Bloomington.

When the concrete recycling operation, etc. began a few years ago, I hoped this would be a temporary situation. Besides being unsightly and an unwelcoming entry to the city, dust from the operation affects the nearby residences, businesses, and restaurants. Noise may be a problem as well, but I'm not close enough to know that.

Adding the garbage transfer to this location would make it even more undesirable. Odor, vermin, even more noise contribute to poor living conditions for the long-time residents in the neighborhood.

Please consider the people adversely impacted by the garbage transfer and vote "no."

Dear Members of the McLean County Board,

It has come to my attention that you are considering putting a landfill within the confines of the City of Bloomington. Though I have not seen a map, in general, I can only say, THAT'S A BAD IDEA! Just the traffic will generate bad results.

In Morris, in Will County, in DeKalb, in Geneva, I saw what the increased traffic did, and these were all outside the main population density. In Geneva, a golf course was created, but it took 20 years. Unless you are considering way outside the Community, a local landfill can only be considered a detriment.

I have lived here with my family since the 60's. There is already too much traffic since the concrete company moved in near that property. What a shame to destroy the former trilakes facility only to be covered in garbage. I say no way.

It is too close the the city limits. It will hurt my property value. It will increase the likely hood of more traffic and could lead to more accidents. It will increase the noise level in a residential area. It can in danger children playing nearby. It will lead to rodents and all of the problems that they cause. It could damage the ground water table.

Once again I say no way. Why not take the garbage way outside of the city limits and use some of the abandoned gravel pits.

Why should a Chicago company benefit from our loss.

We need to beautify bloomington not destroy it. If this passes it will be a huge loss for the community.

As a board member would you want garbage in your backyard? You need to think of the community and the people who live there. You take our tax dollars and we have no choice.

Please do not use my portion to create a dump just so you can get paid. Once again I say no way. Signed a concerned tax paying long term Bloomington resident.

I am asking you to vote no on the trash dumping facility proposal! The wear on our roads daily with up to 400 TONS of trash that we already can't seem to fix, along with the smell, animal infestation, and the decrease to our property values are huge.

There has to be many more remote areas that this could be considered for. This would be an injustice to your constituents if you pass this. Some things are more valuable than money and that includes someone's health and property!

PLEASE VOTE NO!

Gentlemen:

I am writing in support of LRS Transfer Station. In my experience, competition is a plus for business. Competition allows for a better price for the consumer, and more choices for the consumer on who gets their business. By only having one choice, the consumer feels as if choice is taken away from him.

By allowing LRS Transfer Station to operate in the county, business will have a choice whether pay \$90.00 per ton with Republic or \$60.00 per ton with LRS. Businesses will have a chance to find out for themselves who is better for their business. Price of a product is very important to a business.

Location of LRS has been mentioned as a potential problem. LRS will be located in an industrial area, at least 1,000 feet from its closest neighbor. The idea that LRS Transfer will cause an odor problem is incorrect. The garbage will be in fully enclosed building with an ozone system designed to eliminate odor, not mask it. Concern has also been brought of dust becoming a problem for the neighbors. Having enclosed trucks coming and going should eliminate most of this problem. (Just note, Republic does not have an enclosed building)

Dust has been mentioned as a possible problem. Trucks bringing in garbage will be fully enclosed, and trucks leaving the transfer station will be fully enclosed also. There will be no noticeable increase in dust for the neighbors are at least 1,000 feet away.

The LRS Transfer Station will bring a choice for businesses in McLean County

Sincerely,

Belinda Johnson

Say No to the Trash Facility.

This is a very bad idea for this residential area of Bloomington. It's not only the same street where kids get on and off school busses but also city transit. Also the mobile home owners across the street will end up being affect by rodents that come from the dump and will force residents to be on possible danger and accrue more expenses on residents due to clean up from rodents and garbages flying around from the dump.

Also there is a lot of traffic from State Farm sever times a day that use the road by the dump and will affect the traffic from that.

Not only this but also the incredible stench that will come from it and literally steal any joy anyone will have from enjoying their time outdoors or when they have windows open.

Thank you for your time.

I am disheartened and incensed at the idea of this proposed waste disposal site on the south side of Bloomington. I am equally enraged that we, as members of this community, are only hearing about this nonsense in the twilight hours of our chance to speak out.

There is nothing good that can come of this development. I see that the operating company is from the Chicago area. It seems to me that it is not our responsibility to (literally and figuratively) clean up after other people's messes. I don't know how valid the argument is that LRS will get rich at our expense. However, I know full well that some individuals from our own community are set to get a hefty payday for fast tracking this abomination, and frankly, that's even more alarming and disgusting.

This spot is proposed near a mobile home park, and it doesn't take a PhD in civics to know that awful and unsanitary and unsavory development choices are often made adjacent to people in the lowest income brackets. Otherwise the NIMBYs in Ironwood would be fine having a dump over there too, if it's such a boon for our local growth and well-being.

There will be increased pollution across the board. Air, land, water table alike. There will be increased heavy truck traffic, which is not only less safe, but also creates unnecessary strain on the maintenance of the roads. Who foots the bill for needing road repaving every 4 years instead of 10?

Are these trucks going to be electric? I doubt it. They will probably be obnoxiously loud diesel guzzlers.

All in all, this is an absurd plan, It's 2023, there is no time or space for this kind of short-sighted thinking.

To McLean County Board members:

As a homeowner residing in Founders Grove neighborhood, and also, doing business transactions with local businesses who are located in the proposed vicinity of Bun Street for LRS to build their facility, raises valid concerns regarding this proposal:

1. Bloomington's road infrastructure has not been maintained, and current roads cannot handle the additional tonnage of large trucks carrying waste material 7 days a week, without compromising road integrity;
2. Businesses, and the many residents living nearby the proposed area, already deal with significant dust pollution that will only increase if this is voted through. This doesn't even address unsecured trash that potentially escape the trucks carrying in and dumping.
3. The level of noise from all of the trucks will also become an issue for the neighborhoods in the area.
4. Most importantly, having this facility and its truck routes going through, or nearby, residential areas, raises legitimate health concerns for the families living in the neighborhood, who are either elderly, or have small children, or whose health may already be compromised.

Obviously, there is a significant amount of money at stake, but surely, there is a slice of land in McLean County that isn't near residential areas or local businesses, where this facility could be placed.

Please preserve our neighborhoods and vote "No" on this.

Sincerely,

Subject: LRS/Henson Disposal Pollution Control Facility

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

To whom it may concern;

I am adamantly opposed to the implementation of this plant for the reasons stated below:

1. Not knowing the route to be utilized, and just by considering the current state of the existing road, namely Bunn Street, I think the constant flow of semi trucks and the approximate load of 400,000 tons on a daily basis will certainly be too comprehensive.
2. If the roads need to be widened, reconstructed or otherwise bolstered to bear the constant usage, that will doubtless create a tax burden as well.
3. The constant noise and traffic will be most intrusive and disturbing.
4. My property value will most certainly be diminished, causing undue hardship when and if I am in a position to sell my home.

There are many other concerns and questions that are not listed here, but suffice to say my opposition to this plant being forced upon Bloomington and my neighborhood specifically, cannot be expressed strongly enough.

I firmly believe it places a great hardship and an immense burden on those families most closely situated as well as to Bloomington at large.

Sincerely,

Cynthia S. Garwood

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Hello,

I am writing to oppose the trash facility that is being requested to be built in Bloomington. From what I have read and understand, the facility will be very close to residential areas. The traffic alone will be a negative situation, especially with large smelly trucks driving through and near neighborhoods all day, creating dust and smells and noise. These trucks will also impact the state of the roads around this area with repetitive heavy traffic year round. This is a facility that should not be near schools or homes, but instead should be miles from any residential areas. I oppose this facility as I live near the proposed site. I do not want this facility anywhere near my home or neighborhood. Thank you for your careful consideration of the taxpayers who live in this area before voting for this facility.

**Re: Written Public Comment in Opposition to LRS/Henson Disposal
Waste Transfer Siting
Application for Local Siting Approval – Henson Recycling Campus
Transfer Station**

Dear Ms. Michael,

My name is Dan Winters General Manager with Republic Services in Bloomington, Illinois. I am a lifelong resident of McLean County. In 1979 I started as a heavy equipment operator at McLean County Landfill, Inc. In 1990 I became Landfill Manager and worked my way to General Manager to date. In total I have been involved with McLean County's waste management needs for 44 years.

I believe the application submitted by Lakeshore Recycling is insufficient. Simply put, the applicant has not shown that the transfer station is necessary to accommodate the waste disposal needs of McLean County. The existing Republic transfer station has more than enough capacity to manage McLean County's solid waste disposal needs both now and in the future. Based on Sheryl Smith's presentation at the hearing we currently have the capacity to handle all the waste in McLean County, and are projected to have the capacity twenty years into the future.

In closing, I can assure the Board that Republic is a best-in -class Company that takes all aspects of operating solid waste transfer stations very seriously. I commend Republic and my team for having ZERO Notices of Violations from the Illinois Environmental Protection Agency for the Bloomington Transfer Station since I became GM 1997.

In summary, Republic has more than enough capacity to manage McLean County's waste disposal needs such that Lakeshore Recycling's proposed facility is not necessary to accommodate the waste needs of Bloomington Normal. Please vote no.

Regards,

Dan Winters

Michael Brown, McLean Solid Waste Coordinator
202 W College Avenue
Normal, IL 61761

Dear, Mr. Brown

I would like to express a few of my deep concerns with Lakeshore Recycling Systems, LLC Application for Site Location for the Henson Recycling Campus Transfer Station located at 2020 Bunn Street in unincorporated McLean County dated August 18, 2023. As the Bloomington Township Highway Commissioner, I have been aware of the proposed transfer station prior to the sale to Lakeshore Recycling Systems, LLC. Since July of 2021 this idea of a waste transfer station has been a constant topic of concern for Bloomington Township. My concerns are as follows:

1. Township will be responsible for maintaining a roadway that was only built for one business that needs a public roadway to obtain a permit. Had to subdivide property in-order to be 1000 feet away from residential, thus also needs to have public access.
2. The way the process of obtaining the permit doesn't look good in the public eye when within the application there are host agreements only if approved for the City of Bloomington and McLean County with no benefit to the Township.
3. There should be a Road Maintenance Agreement with the Bloomington Township.
4. The additional maintenance of a new storm sewer system.
5. Water/Leachate runoff into local streams.
6. Trash/waste products leaving site. i.e., Birds, animals and wind.
7. Increased truck traffic will not only increase the maintenance of various surrounding township roadways but decrease public safety.
8. Proximity of residential area most likely will have negative impact with home values.
9. Air and noise pollution.
10. Snow removal.

Regards,

Rodney Boester
Bloomington Township Highway Commissioner

Email: [REDACTED]

Select a department to contact: County Clerk

Indicate the nature of your request: I am writing in opposition of the request for Lakeshore Recycling Systems to open a waste transfer station at 2020 Bunn St., Bloomington IL 61701. I am mostly concerned regarding the impact it would have on air quality and property values. While it is debatable if there is even a need for a facility of this nature in our community, if one must be opened, I still do not believe this location would be an appropriate choice, as it would be better suited outside of city limits. I would like to continue living in a neighborhood with clean, fresh air for the sake of health as well as avoiding unpleasant odors. As many would agree, I do not have a desire to live near a facility that emanates a strong odor, especially when my property would fall within that odor's radius. I also am concerned that it may devalue my property. It's important to me for my home to retain it's value, as it is an asset I have invested in and am obligated to continue paying towards. I love my home and the community I live in, which I would hate to be affected by my government allowing a waste transfer facility to be opened in a residential area.

Subject: Trash Facility

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I would like to make my feelings known on the trash facility that is proposed to be built on Bunn St. as I received the public service announcement from the county clerk. It is stated that this facility could affect the value of our property. I feel that the actions of Tom Kirk have already affected the value of our property negatively by living a block down the street from him on Garling Dr. We used to have a nice quiet neighborhood with well manicured lawns and a neatly kept neighborhood. It is my opinion that Mr. Kirk does not feel rules and laws are made for him to follow. If any of you would drive down Garling Dr. and look at his property you might feel the same way I do, that it looks like a junkyard whereby he has gotten by all of the rules and regulations by calling it art. I personally don't call it is art. We have to put up with the noise of the machines etc. that he runs all hours of the day and evening with dust and dirt flying all over the place. Now he is adding a 2-3 story addition to his house when the abstracts specifically say that no house shall be more than one story tall. I feel that this trash facility will go the same way it has gone with his house and once he starts not following the rules and regulations it will just continue to escalate and no one will be able to do anything about it. Don't get me wrong. I personally like Tom. He has always been very nice. I just don't feel he respects the feelings of anyone but himself and that is how the trash facility will go because his yard just started with some cute decorations (turtle) that he made out of rocks but then it escalated to all of the old rusty junk he brought home. I fear that some day a tornado will hit all of that stuff and kill half the people in the neighborhood. I know this trash facility is supposedly owned by some Chicago company but I can't help] wonder if Tom isn't one of the owners of it. I do hope all of you have done your homework about this because I truly feel sorry for the people living across the road from where this is to be built. I think there are a lot of other people that feel the same as I do but since Tom is a very personable man they don't want to offend him. Thank you for listening to my opinion.

Sincerely,

Jennifer Wagner

We oppose this for many reasons, the inability for public comment/Questions , we attended a portion of the meeting in person and it was apparent that the representation for the refuse company was so extremely rude to some council members. Why would you want to form a partnership with such disrespectful individuals, is Bloomington so broke we need to devalue residential areas by putting in a huge garbage operation?

I also believe that this will negatively impact home values in that area, and also deteriorate city roads they travel on, many of them already in poor condition.

Select a department to contact: County Clerk

Indicate the nature of your request: In Opposition to the Planned Trash Facility - I oppose this planned facility for the obvious reasons that it would be close and/or travel near my residence, and it's known to carry a heavy volume of trash described by the City itself as affecting property values due to smell, dust, trash, and possibly environmental issues. In addition, trucks could run every 6 minutes starting at 6 a.m. so this is also a public nuisance. The City should only allow this operation where no residents are anywhere close by, so none of these disturbing impacts that can lower our standard of living in Bloomington are allowed. DON'T ALLOW THIS FACILITY!!

Subject: New Planned Trash Facility - Area Resident Feedback

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

To whom it concerns,

I am reaching out today to make comment on the planned trash facility at 2020 Bunn St.

I live at 1608 Bunn St and do not want another industrial business causing issues on the street.

Noise, pollution, safety. Speeding and wreckless driving are common place on Bunn st. As are bicyclists riding with little thought to the existance of others. How long before these two meet in disaster.

Not only would this cause direct problems for our home, I believe it to be a recipe for disaster waiting to happen. I strongly urge the county to consider a location that is both technically out of town AND literally. Not just technically.

Also, who puts a trash facility across from mobile home park? Way to beat down the people already worse off.

Thank you for your time,

Wallace Tudor

I strongly feel that the proposed trash facility would be a terrible detriment to our community and our neighborhood. The traffic alone would turn our neighborhood from the pleasant place that it now is into a place no one would want to live. The noise pollution and possible trash accumulation would destroy all our property values. This is not an unloved in area, but a part of town with good homes, good families, and good neighborhoods. No one can believe that this level of traffic and trash processing can go on without impacting all of our quality of life. Please stand against this!

Hello & happy New Year to you!

I just wanted to say very quickly that I am a local resident of many years & I do not believe that this trash facility is in the best interests of our community- nor is it the answer to the issues Chicago area is clearly facing. There has to be other options & I implore you to search for them instead of taking the easy way out in allowing this trash facility to move in. Please value our community and say no to this facility.

Thank you for your time & have a wonderful day

Stormy Pippin

Hello,

I would like to voice my opposition to the proposed trash facility in Bloomington. I live near the proposed site and am concerned about the potential negative impact of the facility.

Sincerely,
Alex Stephenson
Bloomington, IL
